

## Strategy vs. Intervention vs. Accommodation vs. Modification

	Strategy	Intervention	Accommodation	Modification
<b>Definition</b>	<p>A loosely defined collective term that is often used interchangeably with the word "intervention"; however strategies are generally considered effective instructional and behavioral practices rather than a set of prescribed instructional procedures, systematically implemented.</p>	<p>Targeted instruction that is based on <u>specific</u> student needs. Interventions supplement the general education curriculum.</p> <p>Interventions are a systematic compilation of well researched or evidence based specific instructional strategies and techniques. Interventions are generally implemented for 6-8 weeks in order to collect progress monitoring data and to measure a student's performance over time.</p> <p>Strategies can become interventions if it includes step-by-step descriptions so it can be implemented consistently and replicated by others.</p>	<p>A change made to the teaching or testing procedures in order to provide a student with access to information and to create an equal opportunity to demonstrate knowledge and skills.</p> <p>Accommodations are designed to provide equity, not advantage.</p>	<p>A change in WHAT the student is expected to learn and/or demonstrate. While a student may be working on modified course content, the subject area remains the same as the rest of the class.</p> <p>Alterations that change, lower, or reduce expectations.</p> <p>Since the curriculum is changed, modifications are usually only available to students on an IEP.</p>
